

Intermediate Truck Self Propelled Stripers

1003T Thermoplastic Traffic Line Applicator

FEATURES

- Safe and economical single operator/striping controls
- Constant speed control using hydrostatic drive
- Equipment powered with one diesel engine, reducing fuel consumption
- Thermoplastic material applied from "zero-pressure" melting kettle to "pumped" ribbon/spray guns or gravity extrude shoes
- Melter burner is diesel fired for single fuel use on the unit.
- Application of glass beads via pressurized (ASME) tank and spray guns
- Electronic "skipline" system allows for varied line patterns
