

Airport Snow Removal Products

Liquid Dispersal Systems With 3600 or 4600 Runway Brooms

Liquid dispersal Systems:

- Custom designed systems to meet needs of individual airports.
- Selectable liquid application rates for anti-icing, deicing or rubber removal operations
- Chassis mounted or trailer type systems. Can be used alone or integrated with broom and / or plow
- Multiple widths and configurations of spray booms
- 1000 gallon agent tank capacity. Other sizes available depending on axle ratings
- Stainless steel agent pump, pressure controlled hydraulically driven
- Integrated, user friendly controls in chassis for spray rates and boom selection. Microprocessor based.
- Optional ground speed control
 - Agent flow controlled proportional to ground speed
 - Up to nine proportional control sections to allow variable ground speed application rates for all spray patterns
 - Typical applications rate densities between 0.4 gallons per 1,000 square feet to 4.0 gallons per 1,000 square feet depending on conditions
- Application speeds between 5 mph and 40 mph

Broom

- Multiple configurations and performance levels available as required
- 46 inch diameter or 36 inch diameter
- Multiple broom lengths: 12, 14, 16, 18, 20, and 22 foot
- With or without air blower
- Optional capability of lifting entire broom head and caster tires off the ground for high speed transport.
- Can be configured to allow interchangeability with plow
