

PM Eraser™

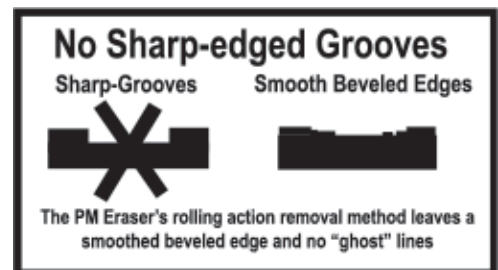

Professional Markings Removal

- The most efficient, lowest removal cost
- Rapid removal of markings from 4" to 24" (10-61cm) wide in a single pass
- Minimal road abrasion without producing sharp-edged grooves or traffic "ghost" lines
- Comfortable, safe and reliable one person operation
- Minimal noise, dust and vibration reduces operator fatigue
- Easy transport and deployment
- Quick field replacement of cutter spindle assemblies

FEATURES

- All steel chassis and housing
- Rapid-set parking brake
- Anti-Vibration shock absorbers
- Durable rubber dust and debris safety shroud
- Accommodates extra long-life
- Tungsten Carbide Cutters
- Rear swivel wheels for easy maneuverability
- Pressure sensitivity control compensates for types and age of pavement
- Depth of cut control infinitely adjusts to limit removal depth, minimizing road abrasion while increasing cutter speed and life

SPECIFICATIONS

	U.S.	Metric
Basic Weight:	256 lbs	116 Kg
Operating Weight:	353 lbs	60 Kg
Base Length:	35"	89 cm
Base Width:	21"	53 cm
Machine Height:	27.5"	70 cm
Handle Height:	34-38"	86-97 cm
Engine:	11 H.P. Honda Gasoline	
Cutter Style:	Tungsten Carbide	
Approx. Removal/Hour:	1,000-3,000 L.F. (305-915M)	
Est. Cutter Life Per Set:	Over 40,000 L.F.	
Color:	Yellow	

ADDITIONAL FEATURES

- Designed to give extended long-life usage on all pavement and floor surfaces, our cutters minimize your recurring cost and match your job requirements.
- Premium quality octagonal shaped tungsten carbide pins remove all types of surface coatings. Mounted on a metal spindle sleeve protector, each cutter contains 3 precision bearings for worry-free high speed RPM and load application stability.
- Tungsten carbide cutters provide extra long life. Their 24 octagonal shaped pins give you more cutting edges for quicker, smoother removal on all surfaces.
- Belt driven cutter assemblies hold a set of three cutters at fixed angles to the removal surface permitting simultaneous vertical and horizontal floating cutter action which eliminates grooving of pavement.
- Unique spindle locking mechanism allows for quick, no-hassle cutter replacements at your job site.
- Innovative depth control guard gives you total control over full or partial removal action, extending cutter life, increasing production and minimizing surface abrasion.
- Pressure sensitivity control regulates the unique floating cutter head to increase or decrease cutter pressure on various types of road surfaces or marking materials.

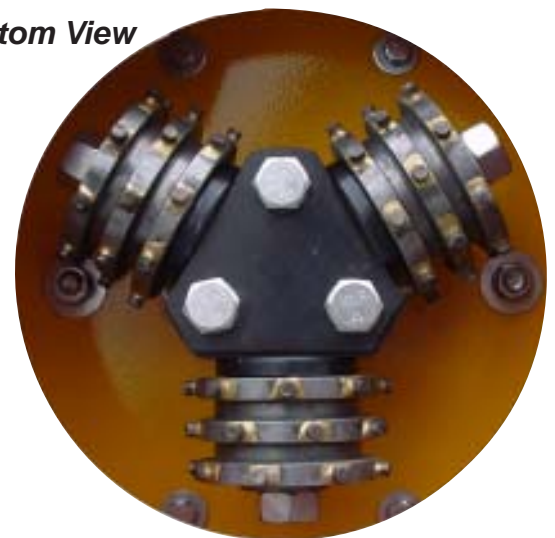

OPTIONAL EQUIPMENT AND SPARE PARTS

- V-belts
- Hardened Steel Cutters
- Tungsten Carbide Cutters
- Rubber Cushions
- Spindle Assemblies
