## MB Audit Program

Pavement Marking Equipment

Avoid unexpected equipment failures by having our highly trained technicians proactively identify necessary updates and maintenance concerns. Gain critical insight into the expenses and labor required to keep your equipment running at peak performance—before problems arise.

### Audit Program Highlights

The Audit Program is customizable to meet each customer's specific needs. Once the audit is complete and the parts and labor costs are calculated, customers can decide how best to proceed with the necessary repairs and upgrades.

- Use the audit findings to perform the repairs and upgrades yourself.
- Leverage the audit findings by having MB order your parts, ship them to you, and assist with the repairs or upgrades.
- Review the audit findings and have MB handle everything—from ordering and installing parts to completing repairs and upgrades as requested.

MB's Audit Program gives you a clear view of the costs to restore your equipment and helps assess its value—no matter who completes the repair.

### Investment

- The cost of an audit is \$2,000 per day for each piece of equipment, plus travel expenses. If you choose to have MB order and ship the parts to you, a detailed cost estimate will be provided based on the audit findings.
- Should you opt for MB to complete the repairs and upgrades, a cost breakdown will be sent to you based on the audit findings.
- For any additional repairs identified during the annual audit, a quote will be sent to the customer. No work on the quoted items will proceed without your approval.
